

## QA Engineer

### ABOUT THE COMPANY AND THE TEAM

Who we are?

A group of software architectures and engineers passionate about technology.

What we do?

The most important is that we change lives.

Every day, our solutions assist in the management of oncology trials, dosing modifications, variable cycle quantities offering clinical trial management, trial supply management, patient logistics and the list can go on.

We developed a system that makes simple, fast and efficient the complexity and unpredictability of a clinical trial.

### With us you will:

Work to deliver custom software solutions that streamline the clinical trial process for pharmaceutical and biotech clients.

Ensure the correct functioning of clinical trial software with focus on patient safety and integrity of clinical study data.

Ensure all activities and deliverables comply with FDA regulations.

Verify that system requirements are clear, testable, and consistent with the clinical trial protocol.

Develop validation plans according to a risk-based testing methodology.

Author and manage the completion of all validation related deliverables on each project: test summary report, etc.

Author and execute test scripts.

Document defects and tracking resolution.

### Requirements:

Bachelor's degree (in computer science preferred) or college degree in progress.

1-2 years Experience in software testing of Enterprise or Web applications.

Experience with multiple testing methods such as: smoke tests, black-box, white-box, gray-box, boundary testing.

Basic knowledge of RDBMS principles and SQL.

Ability to learn technological applications, conduct in-depth investigative research, read and understand code, and determine and execute the best test methods for complex systems.

Highly proficient in spoken and written English.

### Benefits and what we offer:

Supplemental healthcare coverage

Paid lunch in the office

Monthly company sponsored events

Central office location (Universitate)

Possibility to work remote

Flexible working hours, you make your own schedule

Trainings

Personal career path, the possibility to develop and access the next levels

The chance to actually make an impact and change the world

Great team and work environment – we have fun while working.
